

Posit Team User Training Workshop

Thanks for joining us! Here's a recap of what we covered and where to go next.

WHAT YOU LEARNED

- Launched and managed coding sessions in Posit Workbench
- Ran R and Python code interactively in Positron, and automated longer jobs with Workbench Jobs
- Published and shared work with your whole team through Posit Connect
- Deployed reports and applications securely and reproducibly
- Automated workflows by scheduling recurring reports and analyses in Connect
- Learned how Workbench, Connect, and Package Manager fit together as Posit Team

KEEP EXPLORING

Workbench

Launch RStudio, Positron, VS Code, or Jupyter sessions in your browser.

posit.co/products/enterprise/workbench

Connect

Publish reports, apps, and APIs, and share them securely with your team.

posit.co/products/enterprise/connect

Package Manager

A governed, local source of R and Python packages for your org.

posit.co/products/enterprise/package-manager

KEEP THE MOMENTUM GOING

- **Spin up a session in Workbench**
Launch Positron or RStudio in your browser and try running a script interactively before automating it as a Workbench Job.
- **Publish something to Connect**
Deploy a report, app, or API from your coding environment and share the link with a teammate.
- **Schedule a recurring report**
Set up a report in Connect to re-run on a schedule so stakeholders always see fresh results.

YOUR NEXT STEP
