

Positron AI Workshop

Thanks for joining us! Here's a recap of what we covered and where to go next.

WHAT YOU LEARNED

- Took a tour of Positron and saw why it's well-suited for data science
- Interacted with Quarto documents, generated plots, and explored data with the Data Explorer
- Used Posit Assistant to import, clean, and explore data
- Wrote a summary report using Posit Assistant
- Debugged and wrote code with AI assistance
- Learned Posit's data science-friendly philosophy for AI

KEEP EXPLORING

Positron

Download the free, next-generation IDE for R and Python.

positron.posit.co

Posit Assistant

The AI coding assistant built into Positron for data science work.

positron.posit.co/assistant.html

Posit AI Pass

Sign in once for managed access to frontier AI models, with no API keys.

posit.ai

KEEP THE MOMENTUM GOING

- **Turn on Posit Assistant**
Open the Command Palette in Positron and run “Configure Language Model Providers” to sign in with Posit AI Pass.
- **Try it on your own data**
Bring a dataset from your own work and practice the import, clean, and explore workflow from today's session.
- **Write your next summary report with Posit Assistant**
Use the `/report` command in Posit Assistant to generate a summary report from your current session.

YOUR NEXT STEP
